## Definitions of **application** on the Web:

- a verbal or written request for assistance or employment or admission to a school; "December 31 is the deadline for applications"
- the act of bringing something to bear; using it for a particular purpose; "he advocated the application of statistics to the problem"; "a novel application of electronics to medical diagnosis"
- a program that gives a computer instructions that provide the user with tools to accomplish a task; "he has tried several different word processing applications"
- the work of applying something; "the doctor prescribed a topical application of iodine"; "a complete bleach requires several applications"; "the surface was ready for a coating of paint";
- lotion: liquid preparation having a soothing or antiseptic or medicinal action when applied to the skin; "a lotion for dry skin"
- a diligent effort; "it is a job requiring serious application"
  wordnet.princeton.edu/perl/webwn

- A software program designed to perform a specific task or group of tasks, such as word processing, communications, or database management.
  www.c-3.com/Dict.cfm

- Software programs, such as word processors and spreadsheets that most users use to do work on a computer.
  www.krollontrack.co.uk/legalresources/glossary.asp

- An application or software program is a software executable designed to perform a specific function. Adobe Photoshop is an example of an application designed to perform image editing. Microsoft Word is an example of an application designed to perform word-processing.
  cjs.cadmus.com/da/glossary.asp

- The form used to apply for a mortgage loan, containing information about a borrower's income, savings, assets, debts, and more.
  www.adrhi.com/real-estate-glossary-a.asp

- A computer program, such as an image editor or image browser.
  www.bytecamera.com/content/view/23/27/

- A program or group of programs designed for end users. Applications software includes database programs, word processors, and spreadsheets.
  www.west.asu.edu/achristie/545/webgloss.htm

- An application program (sometimes shortened to application) is any program designed to perform a specific function directly for the user or, in some cases, for another application program. Examples of

---

application programs include Microsoft Word, Excel, Outlook, Internet Explorer, and Adobe Acrobat.
faculty.tui.edu/it/pages/tech_comps/Glossary.htm

- A software piece or module designed to fill the specific needs of a user; for example, software for project management, issue tracking, file sharing, etc. This contrasts with system software, eg operating systems like MS Windows or UNIX.
www.webasyst.net/glossary.htm

- Software that lets users do relatively complex tasks, as well as create and modify documents. Common application types include word processors, spreadsheets, database managers, and presentation graphics programs.
www.incredible.co.za/services/glossary/glossary.asp

- A set of Oracle programs that solve a company's business needs.
www.orafaq.org/glossary/faqglosa.htm

- An initial statement of personal and financial information that is required to approve your loan.
www.advahome.com/howto/glossary.asp

- the first step in the official loan approval process; this form is used to record important information about the potential borrower necessary to the underwriting process.
www.affiliatedmortgageservices.com/html/dictionary.html

- A self-contained program that performs a well-defined set of tasks under user control, as opposed to a system program. Web browsers, mail readers, and FTP clients are examples of applications commonly used on the Internet.
www.netdictionary.com/a.html

- A form, commonly referred to as a 1003 form, used to apply for a mortgage and to provide information regarding a prospective mortgagor and the proposed security.
www.findmyrate.com/learning_center/glossary.php

- Generic term for any software program that carries out a useful task. Word processors and graphics programs are applications.
www.relyprint.com/help_dictionary.html

- A more technical term for program.
www.ontrack.com/glossary/

- A form used to apply for a mortgage loan and to record pertinent information concerning a prospective mortgagor and the proposed security.
www.davismtg.com/davismtg_d.aspx

- In all types of insurance requiring it, a written statement by a prospective policyholder, which gives the information the company, relies upon when underwriting, rating, and issuing the insurance.
www.apmc.us/IndustryGlossary

- the user-level protocol; eg FTP, HTTP, SMTP, etc.
tangentsoft.net/wskfaq/glossary.html

Related phrases:   file transfer protocol   file server   file format   log file   file system   file allocation table   zip file   file extension   file transfer   network file system

## Definitions of **file** on the Web:

- record in a public office or in a court of law; "file for divorce"; "file a complaint"
- smooth with a file; "file one's fingernails"
- a set of related records (either written or electronic) kept together
- proceed in line; "The students filed into the classroom"
- a line of persons or things ranged one behind the other
- office furniture consisting of a container for keeping papers in order
- charge: file a formal charge against; "The suspect was charged with murdering his wife"
- a steel hand tool with small sharp teeth on some or all of its surfaces; used for smoothing wood or metal
- place in a container for keeping records; "File these bills, please"
  wordnet.princeton.edu/perl/webwn

- Filé powder, also called gumbo filé, is used in the making of gumbo, a thick Cajun soup. Together with okra, it provides the distinctive flavor and texture of the soup.
  en.wikipedia.org/wiki/Filé

- A file is a hand tool consisting of a steel shaft whose surface is cut with sharp parallel ridges made by a chisel before the file is hardened. It is used to smooth or cut materials by abrasion. The tool is usually fitted in a handle.
  en.wikipedia.org/wiki/File_(tool)

- file is a program originated in Unix that runs under the shell (command-line) to determine the file type heuristically instead of other simpler ways to classify it, like with file extensions, MIMEs, etc. It also extracts the magic number from executable files.
  en.wikipedia.org/wiki/File_(Unix)

- This page explains commonly used terms in chess in alphabetical order. Some of these have their own pages, like fork and pin. For a list of unorthodox chess pieces, see fairy chess piece; for a list of terms specific to chess problems, see chess problem terminology.
  en.wikipedia.org/wiki/File_(chess)

- A File (or Hand-File) is a metalworking hand tool used to shape material by abrasion. A file typically takes the shape of a steel bar, most of which is covered with an array of crisscrossing steel ridges. One end of the bar, called the tang, is pointed and narrow and attaches to a round handle. Files should never be used without a handle, as the pointed tang can easily injure the operator.
  en.wikipedia.org/wiki/File_(metalwork)

- A file in a computer system is a stream (sequence) of bits stored as a single unit, typically in a file system on disk or magnetic tape.
  en.wikipedia.org/wiki/File_(computing)

- The collection of related data that is stored and retrieved by an assigned name. Contrast with special file (page \*\*\*).
  publib16.boulder.ibm.com/doc_link/en_US/a_doc_lib/aixins/insgdrf/glossary.htm

- A collection of data grouped into one unit on a disk.
  www.ontrack.com/glossary/

- A computer document.
  www.bytecamera.com/content/view/23/27/

- A set of related information that a computer can access by a unique name (eg, a text file, a data file, a DLG file). Files are the logical units managed on disk by the computer's operating system. Files may be stored on tapes or disks.
  www.mcaggis.com/glossary.htm

- An MPI file is an ordered collection of typed data items. MPI supports random or sequential access to any integral set of these items. A file is opened collectively by a group of processes. All collective I/O calls on a file are collective over this group.
  www.mpi-forum.org/docs/mpi-20-html/node173.htm

- A named collection of information that is stored on a computer. Also, an Internet protocol that refers to files on a disk or local area network.
  www.c-latitude.com/glossary.asp

- A collection of related data stored together for later use. A file is stored in a directory on a file system on disk.
  www.orafaq.org/glossary/faqglosf.htm

- a block of information stored on a magnetic media such as a floppy or hard disk or a tape. A file may contain a computer program, a document, or a collection of data.
  nces.ed.gov/pubs98/tech/glossary.asp

- A collection of related information stored and retrieved under a single name.
  www.stanford.edu/dept/itss/pcafs/help/glossary.htm

- Ground sassafras leaves used to season gumbo and other dishes.
  wworks.com/~cajunworld/cjndefs.htm

- A program or collection of data treated as a unit and stored on disk or tape.
  members.tripod.com/~rvbelzen/c128sg/glossary.htm

- A computer file is similar to a paper document holding related information. For example, each computer program or document is stored in a separate file, designated by its own filename.
  www.angelfire.com/bc/nursinginformatics/glossary2.html

- A document or application that has been given a name.
  www.relyprint.com/help_dictionary.html

- To place a paper in the official custody of the clerk of court/court administrator to enter into the files or records of a case. Final Receipt: In a workers' compensation case, it's the form presented by the insurance carrier for the injured employee's signature so that benefits will stop upon return to work. Final Judgment: The written ruling on a lawsuit by the judge who presided at trial. This completes the case unless it is

appealed to a higher court. ...
www.hardisonandleone.com/glossary/glossaryf.html

- A sequence of one or more records terminated by an end-of-file indicator appropriate to the medium.
  archive.stsci.edu/fits/fits_standard/node11.html

- Data stored as a named unit on a data storage medium. Examples: a program, a document, a database.
  www.dataleach.com/resources/recovery-terms.php

- a way of displaying documents in the form in which they will be printed. Used when for legal or other reasons an exact copy of a printed document must be made available electronically. PDF files are displayed and printed using Adobe Acrobat Reader software.
  members.optusnet.com.au/~webindexing/Webbook2Ed/glossary.htm

- A collection of data or information that has a name, called the filename. Almost all information stored in a computer must be in a file. There are many different types of files: data files, text files, program files, directory files, and so on. Different types of files store different types of information. For example, program files store programs, whereas text files store text.
  precisecyberforensics.com/glossary.html

- A collection of bytes, representing a program or data, organized into records and stored as a named group on a disk. SEE ALSO directory directory tree path subdirectory file allocation table (FAT)
  techref.massmind.org/techref/glossary.htm

- Data which has been organized, stored and named. In computing, files are usually stored on disks.
  www.christlinks.com/glossary2.html

- A column of the chessboard.
  www.freedownloadsoft.com/info/file-chess-.html

- A collection of data stored on a disc, usually in groups of sectors.
  www.dvd-makers.com/public/481.cfm

- The complete court record of a case; "to file" a paper is to give it to the court clerk for inclusion in the case record, endorsed upon the document by the clerk is the date the document is filed.
  www.courts.mo.gov/osca/index.nsf/0/8b69295b674dde2186256e15004ea27f

- a named section of a disk, varying in size, used to read and write stored information
  www.its.ex.ac.uk/glossary.shtml

- Any single collection of stored information, typically on floppy or hard disks. A file may be a part of the operating system, an application, or data (such as word processing, graphics, or spreadsheet documents). Anything on a disk that has a filename.
  www.c-3.com/dict.cfm
